

DAUGHERTY PLASTIC SURGERY

FACES OF MEDICINE

TRUE BEAUTY LIES WITHIN. Dr. Robyn Daugherty works tirelessly to give her patients the confidence to allow that beauty to shine through. During her medical training, Dr. Daugherty chose to specialize in plastic surgery because of the creativity it allows and precision it demands. She opened Daugherty Plastic Surgery to deliver top-notch, patient-centered care. She treats every patient like her own family and is honest about what will help her achieve the best result. All decisions

and care are based on her extensive medical and surgical knowledge and the best interest of the patient. Each operation is carefully planned and patients are followed post operatively by Dr. Daugherty herself in addition to her small, friendly staff. She is passionate about delivering natural, beautiful results in the aging face, post-pregnancy body and post-weight loss body. Dr. Daugherty and her husband Scott are the proud parents of four sons.

“The end goal of all the hard work is the joy of watching confident patients walk back through the doors of the practice.”
